Titolo Combinatorial Models for Scheduling Sports Tournaments / / by Celso

C. Ribeiro, Sebastián Urrutia, Dominique de Werra

Pubbl/distr/stampa Cham:,: Springer International Publishing:,: Imprint: Springer,,

2023

ISBN 3-031-37283-2

Edizione [1st ed. 2023.]

Descrizione fisica 1 online resource (xxv, 175 pages) : illustrations (some color)

Collana EURO Advanced Tutorials on Operational Research, , 2364-6888

Disciplina 511.6

Soggetti Operations research

Management science
Mathematical optimization
Calculus of variations

Sports - Economic aspects

Operations Research and Decision Theory Operations Research, Management Science Calculus of Variations and Optimization

Sports Economics

Lingua di pubblicazione Inglese

Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Leagues, tournaments, and schedules Combinatorial structures Metaheuristics and local search Integer programming approaches Case studies
Sommario/riassunto	This book introduces solutions for sports scheduling problems in a variety of settings. In particular the book covers timetabling, the traveling tournament problem, carryover minimization, breaks minimization, tournament design, tournament planning, and referee assignment. A rich selection of applications to sports such as football, baseball, basketball, cricket or hockey are employed to illustrate the methods and techniques. In a step-by-step tutorial format the book describes the use of graph theory concepts, local search operators and integer programming in the context of sports scheduling. The methods presented in this book are essential to sports scheduling in all its dimensions, from tournaments that are followed by millions of people across the world, with broadcast rights that amount to hundreds of millions of dollars in some competitions, to amateur leagues that require coordination and logistical efforts due to the large number of tournaments and competitors.
