	Livello bibliografico	Monografia

Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. The nature of prdation and predator-prey interactions -- pt. 2. Sensory, physiological, and behavioral perspectives -- pt. 3. Poulation- and community-level interactions -- pt. 4. Applied consequences of predator-prey interactions.
Sommario/riassunto	This book addresses the fundamental issues of predator-prey interactions, with an emphasis on predation among arthropods, which have been better studied, and for which the database is more extensive than for the large and rare vertebrate predators. The book should appeal to ecologists interested in the broad issue of predation effects on communities.
