

1. Record Nr.	UNINA990001859920403321
Autore	Glantz, Stanton A.
Titolo	Statistica per discipline biomediche / Stanton A. Glantz ; ed. italiana a cura di Sergio Favilli, Alessandra Marinoni
Pubbl/distr/stampa	Milano, : McGraw-Hill Libri Italia, 1997
ISBN	88-386-2229-9
Edizione	[4. ed.]
Descrizione fisica	XVI, 449 p. : ill. ; 21 cm + 1 floppy disk
Disciplina	574.015 195 610.72 610.727
Locazione	FAGBC FMEBC
Collocazione	60 610.727 GLAS 1997 90 A 3A 20
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Tit. orig. : Primer of biostatistics. 4. ed. americana.

2. Record Nr.	UNINA9910637718503321
Titolo	Pediatric Headache : Evaluation Through Treatment for the General Provider / / edited by Christopher B. Oakley
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2022
ISBN	9783031139314 9783031139307
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (201 pages)
Collana	Medicine Series
Disciplina	618.928491
Soggetti	Pediatrics Neurology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Section 1: Introductory Overview -- Chapter 01: Historical Overview of Pediatric Headache -- Chapter 02 MIGRAINES IN CHILDREN -- Chapter 03: Migraine Precursors in the Pediatric Population -- Chapter 04: Other Primary Headaches Commonly Seen in Pediatrics (tension-type, cluster, TACs) -- Chapter 05 -- Chronic Daily Headaches in Pediatrics -- Section 2: When To Worry and How to Evaluate the Pediatric Headache Patient -- Chapter 06: The Clinic Visit: From History and Exam to When and How to Evaluate a Pediatric Headache Patient -- Section 3: Comorbid Concerns in the Pediatric Headache Patients -- Chapter 07: Neurologic and Psychiatric Comorbidities in Pediatric Headache Patients -- Chapter 08: Dysautonomia and Atopy in Pediatric Headache Patients -- Section 4: Treatment of Pediatric Headache – A Multi-Tiered Approach -- Chapter 09: Lifestyle Modifications and Complimentary/Alternative Therapies -- Chapter 10 -- Prophylactic and Acute Pharmacology for Pediatric Headache -- Section 5: Conclusions -- Chapter 11: Transitioning from Pediatric to Adulthood with Regard to Headaches and Their Subsequent Care -- Chapter 12: Future of Pediatric Headache – Where Do We Go From Here?
Sommario/riassunto	Pediatric headache is the most common neurological complaint that presents to the general pediatrician, urgent care and emergency rooms, and to pediatric neurology. Despite how common headaches are in the

pediatric population and how many children continue to suffer from their headaches on a daily basis, there remains a tremendous disconnect for those tasked with being the first-line providers (general pediatric providers). This stems from the fact that headache patients can be so variable and challenging, with numerous comorbid concerns, all the while requiring an individualized treatment approach without a cure. The purpose of this proposed book is to help foster a better understanding of how to approach, assess, and ultimately treat pediatric headache for the general pediatric provider in an attempt to make what once was a daunting, overwhelming complaint from patients and their families into something each general pediatric provider can conquer with confidence. With the aid of experts in the field of pediatric headache, this book will begin by providing the foundation as to what types of headaches, primary and secondary as well as their precursors, are commonly seen in the pediatric population. From there, the focus will turn to when should the provider worry about a patient who presents with headaches. The clinic visit -- from the history to the "red flags" to the pertinent exam -- will be reviewed in depth to help distinguish between primary and secondary headaches as well as who warrants an evaluation. Additionally, comorbid concerns will be covered as these may have direct impact on the evaluation and subsequent treatments offered. The next section will delve into the treatment of pediatric headache with a comprehensive approach covering everything from lifestyle to complementary and alternative therapies/treatments, to medications, both acute and prophylactic. Other more specialized treatment options such as procedures and devices will also be discussed albeit these options are more likely to be offered by a specialist rather than a general provider. A subsequent section will highlight the unique challenges for the older adolescent patients as they transition into young adulthood. The closing section will highlight the future of pediatric headache.
