

1. Record Nr.	UNINA990001870040403321
Autore	Di Francia, Antonio
Titolo	Digeribilita in vivo, degradabilita in situ e parametri nutritivi in bufali e ovini. 3. Fieni - silo di Medicago sativaL. e di Lolium multiflorum Lam. / Antonio Di Francia, Felicia Masucci, Vincenzo Proto
Pubbl/distr/stampa	Bologna : ..., 1995
Descrizione fisica	p. 31-320 ; 24 cm
Disciplina	636.084
Locazione	FAGBC
Collocazione	60 OP. 147/29 60 OP. 148/16
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Estr. da: Zootecnica e nutrizione animale, 21(6),1995.

2. Record Nr.	UNINA9910987692503321
Autore	Tsironis Giorgos
Titolo	Artificial Intelligence and Complex Dynamical Systems // by Giorgos Tsironis
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2025
ISBN	9783031819469 3031819462
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (391 pages)
Collana	Understanding Complex Systems, , 1860-0840
Disciplina	530.1
Soggetti	System theory Artificial intelligence Quantum theory Quantum electrodynamics Biophysics Epidemiology Complex Systems Artificial Intelligence Quantum Physics Quantum Electrodynamics, Relativistic and Many-body Calculations Teoria de sistemes Intel·ligència artificial Teoria quàntica Electrodinàmica quàntica Biofísica Epidemiologia Sistemes complexos Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1. Complex systems and machine learning -- Chapter 2. Regression and Classification -- Chapter 3. Data manipulation techniques -- Chapter 4. Artificial neurons and deep learning --

Chapter 5. Powerful neural network architectures -- Chapter 6. Autoencoders and more -- Chapter 7. The Discrete Nonlinear Schrödinger Equation -- Chapter 8. Learning Analytical Solutions -- Chapter 9. The targeted energy transfer model -- Chapter 10. Dynamical embedding with autoencoders -- Chapter 11. Chimeras -- Chapter 12. Branching -- Chapter 13. Discrete breathers -- Chapter 14. Quantum targeted transfer with machine learning -- Chapter 15. Learning quantum systems -- Chapter 16. Action potential propagation in the heart -- Chapter 17. Machine learning cardiology -- Chapter 18. Epidemiology with physics informed machine learning -- Chapter 19. Foundations -- Chapter 20. Computational complexity and the butterfly effect.

Sommario/riassunto

This book serves as a comprehensive introduction to nonlinear complex systems through the application of machine learning methods. Artificial intelligence (AI) has affected the foundations of scientific discovery, and can therefore lend itself to developing a better understanding of the unpredictable nature of complex dynamical systems and to predict their future evolution. Utilizing Python code, this book teaches and applies machine learning to topics such as chaotic dynamics and time-series analysis, solitons, breathers, chimeras, nonlinear localization, biomolecular dynamics, and wave propagation in the heart. The consistent integration of methods and models allow for readers to develop a necessary intuition on how to handle complexity through AI. This textbook contains a wealth of expository material, code, and example problems to support and organize academic coursework, allowing the technical nature of these areas of study to become highly accessible. Requiring only a basic background in mathematics and coding in Python, this book is an essential text for a wide array of advanced undergraduate or graduate students in the applied sciences interested in complex systems through the lens of machine learning.
