

1.	Record Nr.	UNINA990002207580403321
	Autore	Symposium on microbial toxins : (1966
	Titolo	Biochemistry of some foodborne microbial toxins : papers presented at the Symposium on microbial toxins, held at the meeting of the American chemical society, New York, September 12, 1966 / edited by Richard I. Mateles and Gerald N. Wogan
	Pubbl/distr/stampa	Cambridge, Mass. : MIT Press, c1967
	Descrizione fisica	xi, 171 p. ; 24 cm
	Locazione	FFABC
	Collocazione	80 XII D 16
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910300326503321
	Autore	Hartofilakidis George
	Titolo	Congenital Hip Disease in Adults // by George Hartofilakidis, George C. Babis, Kalliopi Lampropoulou-Adamidou
	Pubbl/distr/stampa	Milano : , : Springer Milan : , : Imprint : Springer, , 2014
	ISBN	88-470-5492-3
	Edizione	[1st ed. 2014.]
	Descrizione fisica	1 online resource (173 p.)
	Disciplina	617.581
	Soggetti	Orthopedics Surgery Rheumatology Surgical Orthopedics
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	1 The Hip: Basic Anatomy -- 2 Osteoarthritis of the Hip -- 3 Congenital

Hip Disease: General Aspects, Terminology and Classification -- 4
Epidemiology, Demographics and Natural History -- 5 Treatment
Options except Total Hip Replacement (THR): Conservative
management and Osteotomies -- 6 Total Hip Replacement (THR):
Indications and Preoperative Assessment -- 7 Technical Considerations
-- 8 Complications and Results -- 9 Presentation of Difficult Cases --
10 Timing for Revision -- 11 Quality of Life after Total Hip
Replacement -- 12 Conclusive Messages.

Sommario/riassunto

Congenital hip disease (CHD) is the main cause of secondary osteoarthritis (OA) of the hip in young adults, which accounts for almost 40% of all cases of hip OA. Total hip replacement (THR) performed using optimal techniques can achieve a radical improvement in the quality of life of adult patients. This book offers in-depth coverage of all aspects of CHD in adults and its treatment. Relevant information is first provided on the basic anatomy of the hip and OA of the hip and on the classification, epidemiology, and natural history of CHD. The now limited role of femoral and pelvic osteotomies is carefully evaluated, and the use of THR is then considered in detail. Indications and preoperative planning are discussed, and the available operative techniques, analyzed. Clear guidance is provided on overcoming major technical difficulties, and the benefits of particular approaches and techniques are highlighted. More than 180 images and numerous case studies complement this reader-friendly text. The book will be an invaluable tool for orthopedic surgeons, rheumatologists and radiologists. .
