| Nota di contenuto       | ENZYME CASCADES AND THEIR CONTROL IN BLOOD PLASMA 151 fault<br>as not clotting when necessary at the site of a wound. It has long been<br>known that many "factors" participate in the clotting mechanism. The<br>function of the many factors is probably to make a f                                                                                                                                                                                                                          |
| Sommario/riassunto      | The Advances in Chemical Physics series provides the chemical physics<br>and physical chemistry fields with a forum for critical, authoritative<br>evaluations of advances in every area of the discipline. Filled with<br>cutting-edge research reported in a cohesive manner not found<br>elsewhere in the literature, each volume of the Advances in Chemical<br>Physics series serves as the perfect supplement to any advanced<br>graduate class devoted to the study of chemical physics. |
