

1. Record Nr.	UNINA990003009290403321
Titolo	L'\ analisi della politica : Problemi e prospettive / Stefano Passigli
Pubbl/distr/stampa	Firenze : Sansoni, \c\1971
Descrizione fisica	179 p. ; 20 cm
Disciplina	19200 19210 19220
Locazione	SE
Collocazione	S 19200 PAS
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910220753103321
Titolo	The Diapason
Pubbl/distr/stampa	[Des Plaines, IL, etc.] , : [Scranton Gillette Communications, etc.]
Descrizione fisica	1 online resource
Disciplina	786.5/05
Soggetti	Organ music Organists Muziekinstrumenten Orgels Kerkmuziek Orgue, Musique d' Organistes Periodicals.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico

Note generali Editor: Dec. 1909-<Nov. 1940> S.E. Gruenstein.

Sommario/riassunto "An international monthly devoted to the organ, the harpsichord and church music."
Includes music.

3. Record Nr. UNINA9910557346803321

Autore Garcia-Gonzalez Carlos A

Titolo Biopolymers in Drug Delivery and Regenerative Medicine

Pubbl/distr/stampa Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2021

Descrizione fisica 1 online resource (194 p.)

Soggetti Medicine and Nursing

Lingua di pubblicazione Inglese

Formato Materiale a stampa

Livello bibliografico Monografia

Sommario/riassunto Biopolymers including natural (e.g., polysaccharides, proteins, gums, natural rubbers, bacterial polymers), synthetic (e.g., aliphatic polyesters and polyphosphoester), and biocomposites are of paramount interest in regenerative medicine, due to their availability, processability, and low toxicity. Moreover, the structuration of biopolymer-based materials at the nano- and microscale along with their chemical properties are crucial in the engineering of advanced carriers for drug products. Finally, combination products including or based on biopolymers for controlled drug release offer a powerful solution to improve the tissue integration and biological response of these materials. Understanding the drug delivery mechanisms, efficiency, and toxicity of such systems may be useful for regenerative medicine and pharmaceutical technology. The main aim of the Special Issue on "Biopolymers in Drug Delivery and Regenerative Medicine" is to gather recent findings and current advances on biopolymer research for biomedical applications, particularly in regenerative medicine, wound healing, and drug delivery.

Contributions to this issue can be as original research or review articles and may cover all aspects of biopolymer research, ranging from the chemical synthesis and characterization of modified biopolymers, their processing in different morphologies and hierarchical structures, as well as their assessment for biomedical uses.
