| Sommario/riassunto | Antimicrobial packaging has recently attracted a great deal of interest from the food industry due to the boost in consumer demand for minimally-processed, preservative-free products. Antimicrobial polymeric packaging systems can be considered an emerging |

technology that could have an important impact on shelf life extension and food safety. Novel polymeric-based packaging materials are continually being developed. This book collects carefully chosen examples of the most recent and relevant advances in the preparation and characterization of antimicrobial composites for food packaging applications. Different polymer nanocomposites with improved packaging properties are discussed along with their mechanisms of action. Further, future perspectives for antimicrobial polymeric nanomaterials are provided.

3. Record Nr.	UNINA9910817805703321
Autore	Sersiron Nicolas
Titolo	Dette et extractivisme : la resistible ascension d'un duo destructeur // Nicolas Sersiron
Pubbl/distr/stampa	Paris : , : Les Editions Utopia, , [2018] ©2018
ISBN	2-919160-82-6
Descrizione fisica	1 online resource (204 pages)
Disciplina	333.7
Soggetti	Economic development - Environmental aspects Conservation of natural resources - Economic aspects Biopiracy
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
