1. Record Nr. UNINA990003292980403321

Autore	Stanley, H.
Titolo	Comment j'ai retrouve Livingstone / H. Stanley ; voyage abrege d'apres la traduction de Mme. H. Loreau par J. Belin-de-Launay
Pubbl/distr/stampa	Paris, : Hachette, 1877
Descrizione fisica	247 p.
Disciplina	916.04
Locazione	DECGE
Collocazione	040.014.STA
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr. UNINA9910874673003321

Autore	Khovavko Alexander
Titolo	Carbon Nanostructured Materials : Synthesis, Characterization, and Industrial Applications / / by Alexander Khovavko, Eugene Strativnov, Andrii Nebesnyi, Denis Filonenko, Olexiy Sviatenko, Angela Piatova, Maksym Barabash
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024
ISBN	9783031641213 9783031641206
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (163 pages)
Collana	SpringerBriefs in Materials, , 2192-1105
Altri autori (Persone)	StrativnovEugene NebesnyiAndrii FilonenkoDenis SviatenkoOlexiy PiatovaAngela BarabashMaksym
Disciplina	620.5
Soggetti	Nanotechnology Materials Carbon Chemistry Condensed matter Surfaces (Physics)

	Fluid mechanics Mathematical models Carbon Materials Two-dimensional Materials Surface and Interface and Thin Film Engineering Fluid Dynamics Mathematical Modeling and Industrial Mathematics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Synthesis of Carbon Nanotubes from Products of Hydrocarbons Conversion by CVD Method -- Design of Modern Equipment for Synthesis of Carbon Nanomaterials -- Production Technology and Application of Materials Based on Thermally Expanded Graphite.
Sommario/riassunto	This book provides a concise yet comprehensive look at carbon nanostructured materials, focusing on synthesis methodologies, applications, and fundamental principles. Based on extensive research conducted at the Gas Institute of the National Academy of Sciences of Ukraine, it offers a thorough examination of recent advancements in the field. The book describes various synthesis techniques, particularly emphasizing the continuous synthesis of carbon nanotubes (CNTs) on metal catalysts using chemical vapor deposition (CVD). It also discusses computational fluid dynamics (CFD) modeling of heating processes associated with carbon materials, crucial for understanding the thermodynamics of complex gas systems relevant to CNTs synthesis. Furthermore, the book discusses the structural properties of carbon nanomaterials, employing techniques such as Raman spectroscopy and optical microscopy. It provides detailed insights into the design and optimization of modern equipment for CNTs synthesis, with a focus on energy-efficient reactors for thermally expanded graphite (TEG) production. Beyond synthesis methodologies, the book explores applications of carbon nanomaterials, including their use in lithium-ion batteries, water purification systems, and nuclear reactors. It offers a serious examination of the potential environmental and technological implications of these materials. Comprising three distinct parts, each supplemented with comprehensive summaries, this book serves as a valuable resource for researchers, engineers, and graduate students in material science, thermal engineering, and nanotechnology. It presents empirical findings, theoretical insights, and practical applications, establishing itself as a valuable addition to the literature in the field of carbon nanostructured materials.
