

1. Record Nr.	UNINA990003307940403321
Autore	Brunot, Ferdinand <1860-1938>
Titolo	Histoire de la Langue Francaise des Origines 1900-Tome IV : La Langue classique
Pubbl/distr/stampa	PARIS : ARMAND COLIN, 1947
Disciplina	730
Locazione	DECLI
Collocazione	730 BRU /3
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910462404603321
Autore	Hume Mick
Titolo	There is no such thing as a free press [[electronic resource]] : -- and we need one more than ever // by Mick Hume
Pubbl/distr/stampa	Exeter, : Imprint Academic, 2012
ISBN	1-283-69259-7 1-84540-352-5
Descrizione fisica	1 online resource (202 p.)
Collana	Societas
Disciplina	303.376 342.7308
Soggetti	Freedom of the press - Great Britain Journalism - Great Britain Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Cover; Contents; Front matter; Title page; Copyright page; Dedication; Preface; Body matter; 1: "I Believe in a Free Press, But..."; 2: Whose Ethics Are They Anyway?; 3: Fear and Loathing of the Popular; 4: Why

Blame "the Meejah"?; 5: Here is the News: Journalism as Narcissism; 6: Leveson's Mission - Purging the Press; 7: Manifesto for a Free Press; Back matter; Other titles available from Imprint Academic and Andrews UK

Sommario/riassunto

The aim of this book is to launch a polemic for the freedom of the press against all of the attempts to police, defile and sanitise journalism today. Once the media reported the news. Now it makes it. From the phone-hacking scandal to rows about press regulation, super-injunctions, leaks, libel and privacy laws, the power of the Murdoch empire, and the future of the BBC, the media has become the story. The British press is in crisis and under scrutiny as never before. In the fall-out from ...

3. Record Nr.	UNINA9910830154003321
Autore	Ghilani Charles D.
Titolo	Adjustment computations : spatial data analysis // Charles D. Ghilani
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley, , 2018 ©2018
ISBN	1-119-39061-3 1-5231-2338-9 1-119-39066-4 1-119-39031-1
Edizione	[Sixth edition.]
Descrizione fisica	1 online resource (1 volume) : illustrations
Disciplina	526.9
Soggetti	Surveying - Mathematics Spatial analysis (Statistics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Observations and their analysis -- Random error theory -- Confidence intervals -- Statistical testing -- Propagation of random errors in indirectly measured quantities -- Error propagation in angle and distance observations -- Error propagation in traverse surveys -- Error propagation in elevation determination -- Weights of

observations -- Principles of least squares -- Adjustment of level nets -- Precisions of indirectly determined quantities -- Adjustment of horizontal surveys : trilateration -- Adjustment of horizontal surveys : triangulation -- Adjustment of horizontal surveys : traverses and horizontal networks -- Adjustment of GNSS networks -- Coordinate transformations -- Error ellipse -- Constraint equations -- Blunder detection in horizontal networks -- The general least squares method and its application to curve fitting and coordinate transformations -- Three-dimensional geodetic network adjustment -- Combining GNSS and terrestrial observations -- Analysis of adjustments -- Computer optimization.

Sommario/riassunto

The definitive guide to bringing accuracy to measurement, updated and supplemented Adjustment Computations is the classic textbook for spatial information analysis and adjustment computations, providing clear, easy-to-understand instruction backed by real-world practicality. From the basic terms and fundamentals of errors to specific adjustment computations and spatial information analysis, this book covers the methodologies and tools that bring accuracy to surveying, GNSS, GIS, and other spatial technologies. Broad in scope yet rich in detail, the discussion avoids overly-complex theory in favor of practical techniques for students and professionals. This new sixth edition has been updated to align with the latest developments in this rapidly expanding field, and includes new video lessons and updated problems, including worked problems in STATS, MATRIX, ADJUST, and MathCAD. All measurement produces some amount of error; whether from human mistakes, instrumentation inaccuracy, or environmental features, these errors must be accounted and adjusted for when accuracy is critical. This book describes how errors are identified, analyzed, measured, and corrected, with a focus on least squares adjustment—the most rigorous methodology available. Apply industry-standard methodologies to error analysis and adjustment Translate your skills to the real-world with instruction focused on the practical Master the fundamentals as well as specific computations and analysis Strengthen your understanding of critical topics on the Fundamentals in Surveying Licensing Exam As spatial technologies expand in both use and capability, so does our need for professionals who understand how to check and adjust for errors in spatial data. Conceptual knowledge is one thing, but practical skills are what counts when accuracy is at stake; Adjustment Computations provides the real-world training you need to identify, analyze, and correct for potentially crucial errors.
