

1. Record Nr.	UNINA990003319040403321
Autore	Glassie, Henry H. <Henry Haywood ; <1941-
Titolo	Passing the time. Folklore and History of an Ulster Community
Pubbl/distr/stampa	Dublin : The O'Brien Press, 1982
Disciplina	398.2
Locazione	DECLI
Collocazione	398.2 GLA /2
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910796767903321
Autore	Wang JinRong (Mathematics professor)
Titolo	Fractional Hermite-Hadamard inequalities / / JinRong Wang, Michal Feckan
Pubbl/distr/stampa	Berlin ; ; Boston : , : De Gruyter, , [2018] ©2018
ISBN	3-11-052244-6 3-11-052362-0
Descrizione fisica	1 online resource (390 pages)
Collana	Fractional calculus in applied sciences and engineering ; ; Volume 5
Disciplina	515/.83
Soggetti	Fractional calculus Calculus
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Acknowledgment -- Preface -- Contents -- 1. Introduction -- 2. Preliminaries -- 3. Fractional integral identities -- 4. Hermite-Hadamard inequalities involving Riemann-Liouville fractional integrals -- 5. Hermite-Hadamard inequalities involving Hadamard fractional integrals -- Bibliography -- About the authors -- Index

Sommario/riassunto

This book extends classical Hermite-Hadamard type inequalities to the fractional case via establishing fractional integral identities, and discusses Riemann-Liouville and Hadamard integrals, respectively, by various convex functions. Illustrating theoretical results via applications in special means of real numbers, it is an essential reference for applied mathematicians and engineers working with fractional calculus. ContentsIntroductionPreliminariesFractional integral identitiesHermite-Hadamard inequalities involving Riemann-Liouville fractional integralsHermite-Hadamard inequalities involving Hadamard fractional integrals

Monografia

Description based upon print version of record.

Includes bibliographical references at the end of each chapters and index.

Front Cover; Natural Gas Processing; Copyright; Dedication; Natural Gas Processing; Contents; About the Author; Preface; Chapter 1 - Overview of Natural Gas Resources; 1.1 The formation of natural gas; 1.2 Conventional natural gas resources; 1.3 Gas reservoir fluids; 1.4 Unconventional natural gas resources; 1.5 Hydraulic fracturing; Further reading; Chapter 2 - Natural Gas Properties; 2.1 Fluid distribution in reservoir; 2.2 Phase behavior of hydrocarbon systems; 2.3 Pressure-volume-temperature properties of hydrocarbon fluids; 2.4 Gas

compressibility factor; 2.5 Equation of state
2.6 Gas specific gravity2.7 Gas density; 2.8 Specific volume; 2.9 Isothermal compressibility of gases; 2.10 Gas formation volume factor; 2.11 Standard volume; 2.12 Acentric factor; 2.13 Viscosity; 2.14 Thermal conductivity; 2.15 Gross heating value of natural gases; References; Further reading; Chapter 3 - Single-phase and Multiphase Flow in Natural Gas Production Systems; 3.1 Basic fluid flow theory; 3.2 Process pipe sizing for plants located onshore single phase; 3.3 Process pipe sizing for plants located offshore; 3.4 Transmission pipelines; 3.5 Two-phase mixture properties
3.6 Two-phase flow pressure drop3.7 General aspects in design of piping systems in oil, gas, and petrochemical plants; 3.8 Isometric drawings; 3.9 Line identification list; 3.10 Pipe supports; 3.11 Pressure testing diagram; 3.12 Tie-in diagram; 3.13 Above-ground piping systems; 3.14 Valves; 3.15 Flanges; 3.16 Instrument piping; 3.17 Sample systems; 3.18 Vents and drains; 3.19 Blow-down; 3.20 Utility piping; 3.21 Piping adjacent to equipment; 3.22 Piping flexibility; 3.23 Piping supports; 3.24 Insulation; 3.25 Piping connections to existing plant; 3.26 Underground piping systems; References
Further readingChapter 4 - Gas-Liquid Separators; 4.1 Gravity settling; 4.2 Gas-liquid separators in oil and gas processing; 4.3 Conventional gas-liquid separators; 4.4 Design criteria of separators; 4.5 Gas-liquid separator sizing; 4.6 Specification sheet; 4.7 Mist eliminator type and installation point; 4.8 Centrifugal gas-liquid separators; 4.9 Flare knock-out drums; 4.10 Gas-liquid filter separators; 4.11 Process requirements of vessels, reactors, and separators; 4.12 Nature of the feed; 4.13 Solid-liquid separators
4.14 Typical equations, which can be used for terminal velocity calculation4.15 Vessels; Reference; Further reading; Chapter 5 - Gas Compressors; 5.1 Type selection criteria; 5.2 Centrifugal compressors; 5.3 Design criteria; 5.4 Reciprocating compressors; 5.5 Axial compressors; 5.6 Screw compressors; 5.7 Rotary compressors; 5.8 Compressor cooling water jacket; 5.9 Atmospheric pressure; 5.10 Specification sheets; 5.11 Material for axial and centrifugal compressors and expander-compressors; 5.12 Centrifugal and axial compressors; 5.13 Integrally geared compressors; 5.14 Expander-compressors
Reference

Sommario/riassunto

Natural gas is considered the dominant worldwide bridge between fossil fuels of today and future resources of tomorrow. Thanks to the recent shale boom in North America, natural gas is in a surplus and quickly becoming a major international commodity. Stay current with conventional and now unconventional gas standards and procedures with Natural Gas Processing: Technology and Engineering Design. Covering the entire natural gas process, Bahadori's must-have handbook provides everything you need to know about natural gas, including: Fundamental background on natural gas pro
