

1. Record Nr.	UNINA990003524330403321
Autore	Fulton, Robert
Titolo	A treatise on the improvement of canal navigation; exhibiting the numerous advantages to be derived from small canals. And boats of two to five feet wide, containing from two to five tons burthen. With a description of the machinery for facilitating conveyance by water through the most mountainous countries, independent of locks and aqueducts: including observations on the great importance of water communications, with thoughts on, and designs for, aqueducts and bridges of iron and wood. Illustrated with seventeen plates. By R. Fulton, civil engineer
