Swartz); "Watermarks" in the MS Munich, Hebr. 95: Magical Recipes in Historical Context (Giuseppe Veltri) The Unwritten Chapter: Notes towards a Social and Religious History of Geniza Magic (Steven Wasserstrom) Magic and Human Reason (Marcel Sigrist); Index

Sommario/riassunto

This book discusses various aspects of the theory and practice of magic in antique cultures around the Mediterranean. While some of its contributors address problems of methodology of research into magic and the definition of magic, others deal with specific historical and textual issues. Although a major focus is on Jewish texts ranging from antiquity to the medieval period, the book also includes studies of several magical texts from ancient Mesopotamia and their impact on later magical practice, and studies of Greek and Zoroastrian texts and artifacts. The approaches thus range from the examination of textual or visual sources to theoretical issues such as the history of research and the definition of magic.

Sommario/riassunto	Money speaks in everyday life and in literature of our greed and our generosity, our pride and our humiliation and as it passes among us it shows our creativity and our ability to co-operate even while it can also lead us to fight to the death. This book is for psychological therapists and for the general reader interested in human nature. Money has

mattered since the first human attempts to symbolise value and enable people to wait for the return on their own labours. Since the financial crisis of 2008 its impact at a macro as well as a micro level is inescapable. It has become a means of exchange, much like language and has opened up social mobility to factors other than birth. This book looks at the origin of money and its history but most of all, what attitudes to money tell us about the way we connect to each other.
