Sommario/riassunto	Robert Starratt, a teacher of people in leadership positions, presents the foundations for the theory of leadership. Based on a framework divided into building blocks, various concepts of leadership such as values, change, power and structure are explained and analyzed, and ways of incorporating them into school management are addressed. He presents a picture of leadership as a variety of disciplines - history, philosophy, psychology, politics, sociology, theology - amongst others, and with the idea that the student of leadership must be one of change.; This text is primarily intended for headmasters, education managers and administrators, students and lecturers in education and philosophers of education.
