Nota di contenuto	Automata for reversible computation -- Notation and languages for reversible computation -- Synthesis and optimization for reversible circuits -- Validation and representation of quantum logic.
Sommario/riassunto	This book constitutes the refereed proceedings of the 6th International Conference on Reversible Computation, RC 2014, held in Kyoto, Japan, in July 2014. The 14 contributions presented together with three invited talks were carefully reviewed and selected from 27 submissions. The papers are organized in topical sections on automata for reversible computation; notation and languages for reversible computation; synthesis and optimization for reversible circuits; validation and

representation of quantum logic.
