Sommario/riassunto

In the era marked by globalization and its profound impacts on individuals, societies, states and markets, world-class universities need to position themselves in the forefront of seeking conceptual and practical solutions to daunting challenges by paying greater attention to their roles in serving local society and contributing to global common goods. Based on the findings of the Seventh International Conference on World-Class Universities, *World-Class Universities: Towards a Global Common Good and Seeking National and Institutional Contributions* provides updated insights and debates on how world-class universities will contribute to the global common good and balance their global, national and local roles in doing so.
