Nota di bibliografia	Includes bibliography: p. 223-238 and index.
Nota di contenuto	CONTENTS; INTRODUCTION; 1. To the Crossroads in Vietnam; 2. "The Day of Reckoning Is Coming,"; 3. "Stable Government or No Stable Government,"; 4. "A Bear by the Tail,"; 5. "Where Are We Going?,"; 6. "If I Were Ho Chi Minh, I Would Never Negotiate,"; 7. "What in the World Is Happening?,"; 8. "Can You Stop It?,"; 9. "Better'n Owl,"; CONCLUSION; BIBLIOGRAPHICAL NOTE; NOTES; INDEX;
Sommario/riassunto	In November of 1964, as Lyndon Johnson celebrated his landslide victory over Barry Goldwater, the government of South Vietnam lay in a shambles. Ambassador Maxwell Taylor described it as a country beset by "chronic factionalism, civilian-military suspicion and distrust, absence of national spirit and motivation, lack of cohesion in the social structure, lack of experience in the conduct of government." Virtually no one in the Johnson Administration believed that Saigon could defeat the communist insurgency--and yet by July of 1965, a mere nine months later, they would lock the United States

Titolo	Emerging Networking in the Digital Transformation Age : Approaches, Protocols, Platforms, Best Practices, and Energy Efficiency / / edited by Mikhailo Klymash, Andriy Luntovskyy, Mykola Beshley, Igor Melnyk, Alexander Schill
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2023
ISBN	3-031-24963-1
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (693 pages)
Collana	Lecture Notes in Electrical Engineering, , 1876-1119 ; ; 965
Disciplina	004.6
Soggetti	Electrical engineering Computational intelligence Electrical and Electronic Engineering Computational Intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.

Nota di contenuto

Emerging Network Technologies for Digital Transformation: 5G/6G, IoT, SDN/IBN, Cloud Computing, and Blockchain -- A Framework for Context-sensitive Control-Loops with Roles -- The Impact of Smart Economy and Digitalization on Market Efficiency -- Self-Driving Cars -- Smart Home: Protocols, Platforms and Best Practices -- Construction and Methods for Solving Problems at the SDN Control Level.

Sommario/riassunto

This book covers a range of leading-edge topics. It is suitable for teaching specialists for advanced lectures in the domains of systems architecture and distributed platforms. Furthermore, it serves as a basis for undergraduates as well as an inspiration for interesting postgraduates, looking for new challenges. It addresses a holistic view of QoS, which becomes nowadays via Digital Transformations less technically and more socially driven. This includes IoT, energy efficiency, secure transactions, blockchains, and smart contracting. Under the term Emerging Networking (EmN), we cover the steadily growing diversity of smart mobile and robotic apps and unmanned scenarios (UAV). EmN supports distributed intelligence across the combined mobile, wireless, and fixed networks in the edge-to-cloud continuum. The 6G driving factors and potentials in the mid-term are examined. Operative (emergency) networking, which assists rescue troops at sites, also belongs to the above-mentioned problems. The EmN architecture includes the components of SDN, blockchain, and AI with efficient slicing and cloud support. The design peculiarities in dynamically changing domains, such as Smart Shopping/Office/Home, Context-Sensitive Intelligent apps, are discussed. Altogether, the provided content is technically interesting while still being rather practically oriented and therefore straightforward to understand. This book originated from the close cooperation of scientists from Germany, Ukraine, Israel, Switzerland, Slovak Republic, Poland, Czech Republic, South Korea, China, Italy, North Macedonia, Azerbaijan, Kazakhstan, France, Latvia, Greece, Romania, USA, Finland, Morocco, Ireland, and the United Kingdom. We wish all readers success and lots of inspiration from this useful book! .
