| Sommario/riassunto | Terraced landscapes with agricultural terraces are cultural landscapes with a special value. This volume presents them in pictures and words |

in all their diversity and attractiveness. After discussing the global and European dimensions of terraced landscapes and their agricultural terraces, the volume focuses on Slovenian terraced landscapes~they are discussed separately by landscape types, individual regions, and sample cases in the territory of selected settlements (pilot areas). The conclusion also draws attention to the exceptional value and appeal of non-agricultural terraced landscapes that have been shaped by nature and man.

Terasirane pokrajine, sestavljene iz kmetijskih teras, so kulturne pokrajine s posebno vrednostjo. Ponekod so v razvitih civilizacijah organizirano nastajale skozi tisoletja, drugje pa povsem spontano, ko se je lovek prilagajal naravnim razmeram in izboljševal svoje možnosti za preživetje. Zato se v njih zrcali sožitje med lovekom in naravo, marsikje pa tudi med ljudmi. Knjiga jih v sliki in besedi predstavlja v vsej njihovi pestrosti in privlanosti. Najprej so izpostavljene svetovne in evropske razsežnosti terasiranih pokrajin in njihovih kmetijskih teras, najve prostora pa namenja slovenskim terasiranim pokrajinam, in sicer loeno po pokrajinskih tipih, po posameznih pokrajinah in po vzornih primerih, ki obsegajo obmoja izbranih naselij. V sklepnem delu opozarja tudi na izjemnost in privlanost nekmetijskih terasiranih pokrajin, ki sta jih oblikovala narava in lovek. Besedila in fotografije dopolnjujejo grafikoni, v katerih so predstavljene temeljne značilnosti izključno terasiranih zemljišč, ugotovljene na podlagi analiz z orodji geografskih informacijskih sistemov.

Nota di contenuto	Introduction: Cascades of war and crime -- Transnational cascades -- Towards a micro-macro understanding of cascades -- Cascades of domination -- Recognising cascades in India and Kashmir -- Mapping conflicts in Pakistan: state in turmoil -- Macro to micro cascades: Bangladesh -- Crime-war in Sri Lanka -- Cascades to peripheries of South Asia -- Evaluating the propositions -- Cascades of resistance to violence and domination -- Conclusion: Cascades and complexity.
Sommario/riassunto	War and crime are cascade phenomena. War cascades across space and time to more war; crime to more crime; crime cascades to war; and war to crime. As a result, war and crime become complex phenomena. That does not mean we cannot understand how to prevent crime and war simultaneously. This book shows, for example, how a cascade analysis leads to an understanding of how refugee camps are nodes of both

targeted attack and targeted recruitment into violence. Hence, humanitarian prevention also must target such nodes of risk. This book shows how nonviolence and nondomination can also be made to cascade, shunting cascades of violence into reverse. Complexity theory implies a conclusion that the pursuit of strategies for preventing crime and war is less important than understanding meta strategies. These are meta strategies for how to sequence and escalate many redundant prevention strategies. These themes were explored across seven South Asian societies during eight years of fieldwork.
