Sommario/riassunto	The impossibility of testing the depth hypothesis of 1960 of a connection between the complexities of grammar and a limited human temporary memory led to questioning the ancient grammatical foundations of linguistics and to developing standard hard-science foundations. This volume is the first detailed report on how to reconstitute linguistics on the new hard-science foundation laid by Victor H. Yngve in 1996.Hard-science (human) linguistics is the scientific study of how people communicate. It studies people and also communicative energy flow and other relevant parts of the physical environme

Sommario/riassunto	This book investigates the causes of inequalities that have developed in the European Union, analyzes their social and economic consequences, and assesses the political measures taken to address these issues – also on the basis of public survey results. The detailed analyses presented focus on structures of inequality to be found in the areas

education, culture, labor market, Internet access, families and children, gender, and the regions of the EU. The book also critically examines both the legal framework conditions and financial / taxation policy as instruments that can be used to either produce or combat inequality.
