|-------------------------|--|
| 1. Record Nr. | UNINA990004643470403321 |
| Autore | Vischer, Robert |
| Titolo | Raffaello e Rubens : due saggi di critica d'arte / Roberto Vischer ; traduzione dal tedesco di Elena Craveri Croce |
| Pubbl/distr/stampa | Bari : Laterza, 1945 |
| Descrizione fisica | 164 p. ; 21 cm |
| Collana | Biblioteca di cultura moderna ; 391 |
| Disciplina | 701.18 |
| Locazione | FLFBC |
| Collocazione | 701.18 VIS 1 |
| Lingua di pubblicazione | Italiano |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| ----- | |
| 2. Record Nr. | UNINA9910557289203321 |
| Autore | Szebeni Gábor J |
| Titolo | Immunophenotyping in Autoimmune Diseases and Cancer |
| Pubbl/distr/stampa | Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2020 |
| Descrizione fisica | 1 online resource (170 p.) |
| Soggetti | Medicine |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Sommario/riassunto | The cooperation of highly specialized cell types maintains the homeostasis of multicellular organisms. The disturbance of that |

harmony contributes to the development of several diseases. Most of the cellular functions are executed by proteins, so it is essential to investigate biological processes at the protein level. Antibodies, complex biomolecules with high specificity, are used to recognize our protein of interest in a process known as "immunophenotyping". One of the routinely used methods to study cellular proteins is flow cytometry, which detects cell surface or intracellular proteins at single-cell resolution. The other most frequent technique is the traditional immunohistochemical investigation of microscopic sections of human tissues. We called authors to publish their latest data studying cancer or autoimmune diseases by immunophenotyping.
