Sommario/riassunto	This book examines the control of problem behaviour in prison from a situational crime prevention perspective. Following the success of situational crime prevention in community settings, Richard Wortley argues that the same principles can be used to help reduce the levels of assault, rape, self-harm, drug use, escape and collective violence in our

prison systems. This pioneering new study proposes a two-stage model of situational prevention that moves beyond traditional opportunity-reduction: it attempts to reconcile the contradictory urges to control prison disorder by 'tightening-up' and hardening the prison environment on the one hand, and 'loosening-off' and normalising it on the other. Combining a comprehensive synthesis and evaluation of existing research with original investigation and ground-breaking conclusions, *Situational Prison Control* will be of great interest to academics and practitioners both in the areas of correction and crime prevention more generally.

Sommario/riassunto	"The importance of quality interpreting in legal and healthcare settings can never be stressed enough, when any mistake - no matter how small - can compromise the delivery of justice or put someone's health at risk. This book addresses issues arising from interpreting in legal and healthcare settings by presenting cutting-edge research findings in interpreting and interpreter education in a number of countries around the world - including those which are relatively new to the field. It contains selected papers from a conference dedicated to such themes - the First International Conference on Legal and Healthcare Interpreting - as well as other invited papers related to the fields of legal and healthcare interpreting. This book is useful not only to scholars and educators, interpreters and translators working in legal or healthcare settings, but also to legal and healthcare professionals who work with interpreters in their day-to-day work, including judges, lawyers, police officers, doctors, midwives and nurses"--
