

1. Record Nr.	UNINA990004823790403321
Autore	Arditi, Bastiano
Titolo	Diario di Firenze e di altre parti della cristianita : (1574-1579) / Bastiano Arditi ; a cura di Roberto Cantagalli
Pubbl/distr/stampa	Firenze : Istituto Palazzo Strozzi, 1970
Descrizione fisica	XXX, 243 p., [1] tav. ; 21 cm
Locazione	FLFBC DECTS
Collocazione	YI 28 3 N05.825
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Istituto Nazionale di Studi sul Rinascimento (al front.). -

2. Record Nr.	UNINA9910580211803321
Autore	Jodar Lucas
Titolo	Mathematical Methods, Modelling and Applications
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (410 p.)
Soggetti	Mathematics and Science Research and information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This volume deals with novel high-quality research results of a wide class of mathematical models with applications in engineering, nature, and social sciences. Analytical and numeric, deterministic and uncertain dimensions are treated. Complex and multidisciplinary models are treated, including novel techniques of obtaining observation data and pattern recognition. Among the examples of treated problems, we encounter problems in engineering, social sciences, physics, biology, and health sciences. The novelty arises with respect to the mathematical treatment of the problem. Mathematical models are built, some of them under a deterministic approach, and other ones taking into account the uncertainty of the data, deriving random models. Several resulting mathematical representations of the models are shown as equations and systems of equations of different types: difference equations, ordinary differential equations, partial differential equations, integral equations, and algebraic equations. Across the chapters of the book, a wide class of approaches can be found to solve the displayed mathematical models, from analytical to numeric techniques, such as finite difference schemes, finite volume methods, iteration schemes, and numerical integration methods.
