Sommario/riassunto	As the emotional components of physical illnesses become more recognised, there is a renewed interest in the potential of art therapy to help patients come to terms with injury, pain and terminal and life-long conditions. A wide range of experienced art therapists describe their work and its benefits to a variety of groups including those with cancer, debilitating conditions such as myalgic encephalopathy (M.E.) and ulcerative colitis. Physical conditions in combination with other factors such as homelessness or learning disabilities, and children with life-long and chronic conditions are also
