Sommario/riassunto

Opportunities to see expert cross-examinations are often infrequent in international arbitration and the occasions to sharpen these skills for many are rare. This book is both an invaluable teaching tool as well as a general guide to effective cross-examination in international arbitration. Based on extensive experience and insight from the authors and aided by practical examples, it provides a thoroughly illustrated analysis of how essential cross-examination techniques can best be adapted to the arbitral format. Concise and well organised, it leads the reader through the different cross-examination techniques in an accessible point by point structure, presenting readers with a clear and authoritative introduction on how best to conduct a cross-examination or a quick-reference for more experienced practitioners. An international arbitration hearing is very different from a trial in a court and any practitioner appearing as counsel, whether common or civil law lawyers, needs to know what will happen and how it will differ in order to adapt their conduct. Hober and Sussman explore the challenges practitioners face when conducting a cross-examination in such an environment and provide practical learning aids to help overcome them. Cross Examination In International Arbitration addresses the common issues that can occur in cross-examination in arbitrations such as adjusting the level of English to consider the competency of the panel's least competent member or how to cross-examine a witness with only the use of a written statement rather than by means of oral direct testimony. By highlighting the common challenges which might arise, the authors present a guide which will benefit those practicing or looking to practice in this field.

Love and Friendship; 17. Particularity and Irreplaceability. 18. The Value of Individuals19. Morality and Personal Relations; 20. Conclusion: Intimacy and Integrity; Notes; Index
Sommario/riassunto	In this book, Blustein presents the first study of an ethics of care, offering a detailed exploration of human "care" in its various guises: concern for and commitment to individuals, ideals, and causes. Blustein focuses on the nature and value of personal integrity and intimacy, and on the questions they raise for traditional moral theory. Among the

topics considered are: what is the nature of caring as such? what do we (and should we) care about? what is implied by the claim that caring supports a sense of the meaningfulness of our lives?
