Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Part I: Editorial Introduction -- Part II: Spatial Systems Analysis -- Part III: Regional Growth and Distribution -- Part IV: Regional Policy and Uncertainty -- Part V: Urban Agglomerations.
Sommario/riassunto	This volume is a collection of fresh and novel contributions to regional science. They commemorate the scientific inheritance of the founding father of regional science, the late Walter Isard. All papers are written by well-known scholars in the field and serve to highlight the great importance of regional science theory and methodology for a better understanding of current spatial and environmental problems throughout our planet. The book showcases a multidisciplinary

panorama of modern regional science research and presents new
insights by applying regional science approaches.
