BASED SOLUTIONS AND APPLICATIONS IN BANDUNG AND KUALA LUMPUR -- 5. WAY FORWARD

Sommario/riassunto

Rapid urbanization and development in Southeast Asia have impacted its high biodiversity and unique ecosystems, directly through the use of forest lands for infrastructure building, and indirectly through increasing ecological footprints. In Greater Bandung, Indonesia and Greater Kuala Lumpur, Malaysia, rapid urbanization over the last thirty years has resulted in an increase in built infrastructure of approximately two and three times respectively. A Nature-Based Solutions approach can potentially underpin urban design and planning strategies in Greater Bandung and Greater Kuala Lumpur, as well.
