Sommario/riassunto	This book explores the references to Egypt in the Pentateuch--twice as dense as in the rest of the Hebrew Bible--in the context of the production of the text's final form during the Persian period. Here, as Greifenhagen shows, Egypt functions ideologically as the primary ""other"" over against which Israel's identity is constructed, while its role in Israel's formation appears as subsidiary and as a superseded stage in a master narrative which locates Israel's ethnic roots in Mesopotamia. But the presentation of this powerful neighbour is equivocal: a dominant anti-Egyptian stance coexists wit

Sommario/riassunto

Nicolai Hartmann was one of the most prolific and original, yet sober, clear and rigorous, 20th century German philosophers. Hartmann was brought up as a Neo-Kantian, but soon turned his back on Kantianism to become one of the most important proponents of ontological realism. He developed what he calls the "new ontology", on which relies a systematic opus dealing with all the main areas of philosophy. His work had major influences both in philosophy and in various scientific disciplines. The contributions collected in this volume from an international group of Hartmann scholars and philosophers explore subjects such as Hartmann's philosophical development from Neo-Kantianism to ontological realism, the difference between the way he and Heidegger overcame Neo-Kantianism, his Platonism concerning eternal objects and his interpretation of Plato, his Aristotelianism, his theoretical relation to Wolff's ontology and Meinong's theory of objects, his treatment and use of the aporetic method, his metaphysics, his ethics and theory of values, his philosophy of mind, his philosophy of mathematics, as well as the influence he had on 20th century philosophical anthropology and biology.
