

1. Record Nr.	UNINA990005817440403321
Autore	García Jiménez, María Emilia
Titolo	Poesía elegiaca medieval en lengua castellana / María Emilia García Jiménez
Pubbl/distr/stampa	Logroño : Gobierno de la Rioja, Instituto de Estudios Riojanos, 1994
ISBN	84-87252-39-7
Descrizione fisica	190 p. ; 25 cm
Collana	Centro de Estudios Gonzalo de Berceo ; 16
Disciplina	861.109
Locazione	FLFBC
Collocazione	861.109 GAR 1
Lingua di pubblicazione	Spagnolo
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910557134403321
Autore	Kusch-Brandt Sigrid
Titolo	Underutilised Resources in Urban Environments
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2020
Descrizione fisica	1 online resource (186 p.)
Soggetti	History of engineering and technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This book is the result of a Special Issue of the journal Resources. The Special Issue was initiated to identify promising solutions and specific challenges in the context of underused resources in urban environments. Authors focus on two main areas: the establishment of circular economy schemes based on valorizing wastes that occur in urban areas and the exploitation of renewable energies. The circular economy and renewable resources hold key potential for increasing the sustainability of cities, and the presented studies enhance our understanding of how to unlock this potential. Effective regulatory frameworks and policymaking processes that balance the power between stakeholders are required to successfully manage energy transition and the transition to more circular economies. The positive role of community engagement merits high attention. To recover valuable resources from household waste, a focus on technology and infrastructure is required but is insufficient; motivational factors and knowledge of citizens are the most essential elements. The need to more reliably quantify and better characterize recyclable material streams also evidently remains, especially where population numbers are further growing. This book provides a rich source to explore promising solutions, challenges, and research needed for the sound management of resources in urban settings.</p>
