How do we share our knowledge? : writing up and making public -- pt. 4. How do we use our knowledge? : action research for good order -- pt. 5. Hopes and prospects.
Sommario/riassunto	Since its first publication, Action Research: Principles and Practice has become a key text in its field. This new updated edition clearly describes and explains the practices of action research and its underlying values, and introduces important new ideas, including:all professionals should be reflective practitioners;they should produce their personal theories of practice to show how they are holding themselves accountable for their educational influences in learning;the stories they produce become a new people's history of action research.
