	Titolo	Le COMMERCE International en 1957-58 en 1959 / a cura de Les parties Contractantes a' l'Accord General sur les Tarifs Douaniers et le Commerce
	Pubbl/distr/stampa	Geneve : Gatt, 1959-60
	Descrizione fisica	2 v. ; 24 cm
	Disciplina	341
	Locazione	FGBC
	Collocazione	XXII GATT 3
	Lingua di pubblicazione	Non definito
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910783483203321
	Autore	Wagener Thorsten
	Titolo	Rainfall-runoff modelling in gauged and ungauged catchments [[electronic resource] /] / Thorsten Wagener, Howard S. Wheeler, Hoshin V. Gupta
	Pubbl/distr/stampa	London, : Imperial College Press, c2004
	ISBN	1-281-86645-8 9786611866457 1-86094-539-2
	Descrizione fisica	1 online resource (333 p.)
	Altri autori (Persone)	WheelerHoward S GuptaHoshin V
	Disciplina	551.48/8015118 627.125
	Soggetti	Rain and rainfall - Measurement Runoff - Measurement Rain gauges
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia

Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 273-300) and index.
Nota di contenuto	Rainfall - Runoff Modelling in Gauged and Ungauged Catchments; Acknowledgements; Preface; Contents; Figures; Tables; 1. Introduction; 2. Rainfall-Runoff Modelling - A Review; 3. A Toolkit for Rainfall-Runoff Modelling; 4. Modelling Gauged Catchments - Local Procedures; 5. Modelling Ungauged Catchments - Regional Procedures; 6. Discussion, Conclusions and Recommendations for Future Research; Appendix A - Some Investigations into Regional Modelling; Appendix B - The Rainfall-Runoff Modelling Toolbox; Appendix C - The Monte Carlo Analysis Toolbox; Notation; Bibliography; Index; About the Authors
Sommario/riassunto	This important monograph is based on the results of a study on the identification of conceptual lumped rainfall-runoff models for gauged and ungauged catchments. The task of model identification remains difficult despite decades of research. A detailed problem analysis and an extensive review form the basis for the development of a Matlab® modelling toolkit consisting of two components: a Rainfall-Runoff Modelling Toolbox (RRMT) and a Monte Carlo Analysis Toolbox (MCAT). These are subsequently applied to study the tasks of model identification and evaluation. A novel dynamic identifiability ap
