1. Record Nr. UNINA990006286600403321

Autore	CONGREGAZIONE (SACRA) PER LA CHIESA ORIENTALE
Titolo	Codificazione Canonica Orientale : fonti
Pubbl/distr/stampa	Roma : Tip. Polyglotte Vaticane, 1935-1942
Descrizione fisica	33 v. ; 30 cm
Disciplina	262.9
Lingua di pubblicazione	Non definito
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Serie II

2. Record Nr. UNINA9910557411203321

Autore	Dharmadasa I. M
Titolo	Advanced Thin Film Materials for Photovoltaic Applications
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2020
Descrizione fisica	1 electronic resource (148 p.)
Soggetti	History of engineering & technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The direct conversion of sunlight into electricity (photovoltaic or PV for short) is evolving rapidly, and is a technology becoming a mainstream clean energy production method. However, to compete with conventional energy production methods using fossil fuels, the conversion efficiency needs to be increased, and the manufacturing cost should be reduced further. Both of these require the improvement

of solar energy materials, and the device architectures used for the conversion of light into electrical energy. This Special Issue presents the latest developments in some solar energy materials like Si, CdTe, CIGS, SnS and Perovskites), and the device structures suitable for next generation solar cells. In particular, the progress in graded bandgap multi-layer solar cells are presented in this Special Issue.
