Sommario/riassunto

This book offers a detailed description of the main barbed pharyngoplasty techniques for the treatment of obstructive sleep apnea. These innovative techniques have spread in recent years and are considered as a validated alternative to the classic respective techniques. The book covers the barbed pharyngoplasty selection criteria, the surgical technique, and discusses the post-operative results. It also includes some chapters on the experience of surgical sleep centers in various parts of the world. Written by leading experts in the field of sleep surgery, this book will be interesting for ENT specialists, oral surgeons, maxillo-facial surgeons, plastic surgeons, sleep doctors, neurologists and pneumologists.
