

1.	Record Nr.	UNINA990006582880403321
	Autore	Sabine, George Holland
	Titolo	Storia delle dottrine politiche / di George H. Sabine
	Pubbl/distr/stampa	Milano : Etas Libri, 1978
	Descrizione fisica	2 v. ; 22 cm
	Collana	Universale Etas ; 5
	Locazione	FSPBC
	Collocazione	COLLEZ. 320 (5) XII A 496
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910453616103321
	Titolo	Correspondence analysis and west Mexico archaeology : ceramics from the Long-Glassow collection / / C. Roger Nance [and four others]
	Pubbl/distr/stampa	Albuquerque : , : University of New Mexico Press, , [2013] ©2013
	ISBN	0-8263-5394-0
	Descrizione fisica	1 online resource (277 p.)
	Altri autori (Persone)	NanceCharles Roger <1938->
	Disciplina	972/.35
	Soggetti	Indian pottery - Mexico - Jalisco - Themes, motives Indian pottery - Mexico - Jalisco Electronic books. Jalisco (Mexico) Antiquities
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references and index.

Sommario/riassunto

"Because the archaeology of West Mexico has received little attention from researchers, large segments of the region's prehistoric ceramic sequences have long remained incomplete. This book goes far toward filling that gap by analyzing a collection of potsherds excavated in the 1960s and housed since then, though heretofore unanalyzed, at UCLA. The authors employ the rarely used statistical technique known as correspondence analysis to sequence the Long-Glassow collection of artifacts. The book explains how correspondence analysis works and how it can be applied in archaeology. In addition to describing the archaeological sites in north central Jalisco where the collection comes from, the authors provide an ethnohistorical overview including information on the earliest Spanish explorers to reach the sites. They sequence more than seventy ceramic types and derive a master sequence from more than ten thousand potsherds. In addition to Mesoamerican archaeologists, the audience will also include other archaeologists concerned with ceramic analysis or the application of statistics to archaeology"--
