Sommario/riassunto	The paper analyzes the forces driving inflation in the new EU10 member countries. A significant part of headline inflation in these countries is due to common factors, such as price level convergence and EU integration. However, idiosyncratic factors have also played a role in the inflation process. These factors are related to the country-specific financial conditions, pass-through from foreign prices, and demand-supply situation in each country, although administered price adjustments and increases of indirect taxes associated with EU accession are also likely to have played a role.

#### Sommario/riassunto

The functional analysis of plant-microbe interactions has re-emerged in the past 10 years due to spectacular advances in integrative study models. This book summarizes basic and technical information related to the plant growth promoting rhizobacteria (PGPR) belonging to the genus Azospirillum, considered to be one of the most representative PGPR last 40 years. We include exhaustive information about the general microbiology of genus Azospirillum, their identification strategies; the evaluation of plant growth promoting mechanisms, inoculants technology and agronomic use of these bacteria and some special references to the genetic technology and use.

Sommario/riassunto

Posing a challenge to more traditional approaches to the history of education, this interdisciplinary collection examines the complex web of beliefs and methods by which culture was transmitted to young people in the long eighteenth century. Expanding the definition of education exposes the shaky ground on which some historical assumptions rest. For example, studying conventional pedagogical texts and practices used for girls' home education alongside evidence gleaned from women's diaries and letters suggests domestic settings were the loci for far more rigorous intellectual training than has previously been acknowledged. Contributors cast a wide net, engaging with debates between private and public education, the educational agenda of Hannah More, women schoolteachers, the role of diplomats in educating boys embarked on the Grand Tour, English Jesuit education, eighteenth-century print culture and education in Ireland, the role of the print trades in the use of teaching aids in early nineteenth-century infant school classrooms, and the rhetoric and reality of children's book use. Taken together, the essays are an inspiring foray into the rich variety of educational activities in Britain, the multitude of cultural and social contexts in which young people were educated, and the extent of the differences between principle and practice throughout the period.
