

1. Record Nr.	UNINA990006912000403321
Autore	Strano, Marco
Titolo	Computer crime / Marco Strano
Pubbl/distr/stampa	Milano : Apogeo, ©2000
ISBN	88-7303-646-5
Descrizione fisica	XXXII, 319 p. ; 21 cm
Disciplina	345.450268
Locazione	FSPBC DINEL
Collocazione	IX E 200 10 C 467
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910637716003321
Autore	Nagar Anima
Titolo	Topological Dynamics of Enveloping Semigroups // by Anima Nagar, Manpreet Singh
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2022
ISBN	981-19-7877-8
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (87 pages)
Collana	SpringerBriefs in Mathematics, , 2191-8201
Disciplina	512.2
Soggetti	Topology Topological groups Lie groups Topological Groups and Lie Groups
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction -- Basic Definitions and Elementary Properties -- Dynamics of Induced Systems -- Dynamical Properties of Enveloping Semigroups -- Enveloping Semigroup of the Induced Systems -- More Investigations.
Sommario/riassunto	This book introduces the theory of enveloping semigroups—an important tool in the field of topological dynamics—introduced by Robert Ellis. The book deals with the basic theory of topological dynamics and touches on the advanced concepts of the dynamics of induced systems and their enveloping semigroups. All the chapters in the book are well organized and systematically dealing with introductory topics through advanced research topics. The basic concepts give the motivation to begin with, then the theory, and finally the new research-oriented topics. The results are presented with detailed proof, plenty of examples and several open questions are put forward to motivate for future research. Some of the results, related to the enveloping semigroup, are new to the existing literature. The enveloping semigroups of the induced systems is considered for the first time in the literature, and some new results are obtained. The book has a research-oriented flavour in the field of topological dynamics.
