Sommario/riassunto	<p>Smart Cities seek to optimize their systems by increasing integration through approaches such as increased interoperability, seamless system integration, and automation. Thus, they have the potential to deliver substantial efficiency gains and eliminate redundancy. To add to the complexity of the problem, the integration of systems for efficiency gains may compromise the resilience of an urban system. This all needs to be taken into consideration when thinking about Smart Cities. The transportation field must also apply the principles and concepts mentioned above. This cannot be understood without considering its links and effects on the other components of an urban system. New technologies allow for new means of travel to be built, and new business models allow for existing ones to be utilized. This Special Issue puts together papers with different focuses, but all of them tackle the topic of smart mobility.</p>

Sommario/riassunto	Der uralte Konflikt zwischen Lust und Vernunft, der in der Geschichte der Philosophie und Psychologie zu manchen ausufernden oder auch abwegigen Überlegungen geführt hat, ist leichter zu durchschauen, wenn man Platons Dialog Philebos sehr genau gelesen hat. Platons Auseinandersetzung mit den semantischen und psychologischen Aspekten des Themas kann sozusagen als grundlegende wissenschaftliche Einführung gelten. Dieser Kommentar zeigt, daß man den Metaphysiker Platon ("Ideenlehre") beiseite la...
