Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Illustrations; Acknowledgements; Abbreviations; Introduction - Tracing the Preclinical Trial of an Indigenous Plant; Chapter 1 - Knowing Umhlonyane/Artemisia afra; Chapter 2 - Engaging in Medicine; Chapter 3 - Tracing Medicine Wayfaring; Chapter 4 - Imagining Indigeneity; Chapter 5 - Healing the Nation; Chapter 6 - Dreams, Ancestors and Sound Healing; Chapter 7 - Weaving Molecules with Life; Conclusion - Imagining the Clinical Trial; References; Index
Sommario/riassunto	Umhlonyane, also known as Artemisia afra, is one of the oldest and best-documented indigenous medicines in South Africa. This bush, which grows wild throughout the sub-Saharan region, smells and tastes like "medicine," thus easily making its way into people's lives and becoming the choice of everyday healing for Xhosa healer-diviners and Rastafarian herbalists. This "natural" remedy has recently sparked curiosity as scientists search for new molecules against a tuberculosis pandemic while hoping to recognize indigenous medicine. Laplante

follows umhlonyane on its trails and trials of beco
