

1.	Record Nr.	UNINA990007447460403321
	Autore	Polvani, Michele
	Titolo	Le impugnazioni de libertate : riesame, appello, ricorso / Michele Polvani
	Pubbl/distr/stampa	Padova : Cedam, 1998
	Descrizione fisica	IX, 370 p. ; 24 cm
	Collana	Problemi attuali della giustizia penale ; 1
	Locazione	DSPCP
	Collocazione	5,2-250(1)
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910780038403321
	Autore	Brown Tony <1946->
	Titolo	Mathematics education and language [[electronic resource]] : interpreting hermeneutics and post-structuralism / / by Tony Brown
	Pubbl/distr/stampa	Dordrecht ; ; Boston, : Kluwer Academic Publishers, c1997
	ISBN	1-280-20762-0 9780306472139 9786610207626 0-306-47213-9
	Edizione	[1st ed. 2002.]
	Descrizione fisica	1 online resource (281 p.)
	Collana	Mathematics education library ; ; v. 20
	Disciplina	510/.71
	Soggetti	Mathematics - Study and teaching Language and education
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references (p. [244]-257) and indexes.

Nota di contenuto

Short Review of Recent Research -- Experiencing Mathematics -- Hermeneutics and Mathematics Education -- The Production of Mathematical Meaning: A Post-Structuralist Perspective -- Sharing Mathematical Perspectives -- The Classroom Environment -- Some Lessons -- The Phenomenology of the Mathematics Classroom -- The Teacher's Perspective -- Teacher-Student Interactions -- Developing Teacher Practice -- Conclusion -- Conclusion.

Sommario/riassunto

'Contemporary thinking on philosophy and the social sciences has been dominated by analyses that emphasise the importance of language in understanding societies and individuals functioning within them; important developments which have been under-utilised by researchers in mathematics education. This book reaches out to contemporary work in these broader fields; drawing on original sources in key areas such as Gadamer and Ricoeur's development of hermeneutics, Habermas' work in critical social theory, Schutz's social phenomenology, Saussure's linguistics and the post-structuralist analysis of Derrida, Foucault and Barthes. Through examining the writings of these major thinkers it is shown how language is necessarily instrumental in developing mathematical understanding; but a language that is in a permanent state of becoming, resisting stable connections to the ideas it locates. The analysis offered extends from children doing mathematics to teachers inspecting and developing their own professional practices.'
