

1. Record Nr.	UNINA990007546520403321
Autore	Mori, Alberto <1909-1993>
Titolo	La Dalmazia / Alberto Mori
Pubbl/distr/stampa	Roma : Cremonese editore, 1942
Descrizione fisica	139 p. : ill. ; 22 cm
Collana	Paesi d'attualità ; 6
Localione	NAP03 ILFGE
Collocazione	GLOTT. B - VI - f - 25 H-02-141
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910583491703321
Autore	Mistrik Ivan
Titolo	Software architecture for big data and the cloud // edited by Ivan Mistrik [and four others]
Pubbl/distr/stampa	Cambridge, Massachusetts : , : Morgan Kaufmann Publishers, , 2017 ©2017
ISBN	0-12-809338-2
Edizione	[First edition.]
Descrizione fisica	1 online resource (433 pages)
Disciplina	005.1
Soggetti	Software engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and indexes.

Software Architecture for Big Data and the Cloud is designed to be a single resource that brings together research on how software architectures can solve the challenges imposed by building big data software systems. The challenges of big data on the software architecture can relate to scale, security, integrity, performance, concurrency, parallelism, and dependability, amongst others. Big data handling requires rethinking architectural solutions to meet functional and non-functional requirements related to volume, variety and velocity. The book's editors have varied and complementary backgrounds in requirements and architecture, specifically in software architectures for cloud and big data, as well as expertise in software engineering for cloud and big data. This book brings together work across different disciplines in software engineering, including work expanded from conference tracks and workshops led by the editors. Discusses systematic and disciplined approaches to building software architectures for cloud and big data with state-of-the-art methods and techniques Presents case studies involving enterprise, business, and government service deployment of big data applications Shares guidance on theory, frameworks, methodologies, and architecture for cloud and big data
