Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- The supply of absence and the provision of sick pay -- The demand for absence -- The markets for absence and for sick pay -- A brief introduction to identification -- The market for absence: empirical evidence -- The demand for absence: empirical evidence -- Policy implications for firms -- Policy implications for states -- Conclusion.
Sommario/riassunto	Absenteeism is the single most important cause of lost labour time, yet it has received much less scholarly attention than more dramatic forms of industrial disruption, such as strikes. Arguing that any explanation of absence rates must take into account the interests of both employers and employees, this book constructs a model of the markets for absence and sick pay. These are not independent since sick pay affects workers' incentives to be absent, and absences affect employers' willingness to pay sick pay. The book reviews the available empirical evidence relating to both markets, stressing the importance of careful identification of the effect of the price of absence on demand, since this is a crucial quantity for firms' policies. It concludes by discussing the implications of the model for human resources management, and for the role of the state in sick pay provision.

3. Record Nr.	UNISALENTO991001423839707536
Autore	Andrew, Christopher
Titolo	L'Archivio Mitrokhin : una storia globale della guerra fredda da Cuba al Medio Oriente/ Christopher Andrew e Vasilij Mitrokhin
