Sommario/riassunto

This volume is the first extensive study of a Christian work from the
4th century, Titus of Bostra's Contra Manichaeos , which is the only text
from the early Greek Church setting out a comprehensive theodicy. The
study illuminates the text's relation to contemporary theology and
philosophy and interprets it in the light of the ideological conflicts
between pagans, Catholic Christians and Manichaeans in the 4th
century. It includes an examination of the possible Manichaean sources
used by Titus, and, furthermore, a critical text study and translation of
central passages in Contra Manichaeos , based both on the Greek text
and the Syriac version of it.
