## Sommario/riassunto

"This innovative, comparative study explores six cases of women's grassroots activism in Mexico, El Salvador, Brazil, and Chile. Lynn Stephen communicates the ideas, experiences, and perceptions of women who participate in collective action, while she explains the structural conditions and ideological discourses that set the context within which women act and interpret their experiences. She includes revealing interviews with activists, detailed histories of organizations and movements, and a theoretical discussion of gender, collective identity, and feminist anthropology and methods."--Jacket.

## Sommario/riassunto

A greatly revised and expanded account of phaselock technologyThe Third Edition of this landmark book presents new developments in the field of phaselock loops, some of which have never been published until now. Established concepts are reviewed critically and recommendations are offered for improved formulations. The work reflects the author's own research and many years of hands-on experience with phaselock loops.Reflecting the myriad of phaselock loops that are now found in electronic devices such as televisions, computers, radios, and cell phones, the book offers readers mu
