Sommario/riassunto	"We look around and feel as if book culture as we know it is crumbling to dust, but there's one important thing to keep in mind: as we know it." What happens if we separate the idea of "the book" from the experience it has traditionally provided? Lynn Coady challenges booklovers addicted to the physical book to confront their darkest fears about the digital world and the future of reading. Is the all-pervasive internet turning readers into web-surfing automatons and books themselves into museum pieces? The bogeyman of technological change has haunted humans ever since Plato warned about the dangers of the written word, and every generation is convinced its youth will bring about the end of civilization. In Who Needs Books?, Coady suggests that, even though digital advances have long been associated with the erosion of literacy, recent technologies have not debased our culture as much as they have simply changed the way we read.
