	Titolo	Baltasar Gracián : antropologia y estética : actas del II coloquio internacional, Berlin, 4-7 de octubre de 2001 / ed. Sebastian Neumeister
	Pubbl/distr/stampa	Berlin : Edition Tranvía, 2004
	ISBN	3-925867-75-9
	Descrizione fisica	336 p. ; 21 cm
	Disciplina	868.3
	Locazione	FLFBC
	Collocazione	868.3 GRAC/S 2
	Lingua di pubblicazione	Spagnolo
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910299245903321
	Autore	Mans Ronny S
	Titolo	Process Mining in Healthcare : Evaluating and Exploiting Operational Healthcare Processes / / by Ronny S. Mans, Wil M. P. van der Aalst, Rob J. B. Vanwersch
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
	ISBN	3-319-16071-0
	Edizione	[1st ed. 2015.]
	Descrizione fisica	1 online resource (99 p.)
	Collana	SpringerBriefs in Business Process Management, , 2197-9618
	Disciplina	005.7
	Soggetti	Application software Management information systems Industrial management Medical informatics Health services administration Information Systems Applications (incl. Internet) Business Process Management Health Informatics Computer Appl. in Administrative Data Processing Health Care Management

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	1 Introduction -- 2 Healthcare Processes -- 3 Process Mining -- 4 Healthcare Reference Model -- 5 Applications of Process Mining -- 6 Data Quality Issues -- 7 Epilogue.
Sommario/riassunto	<p>What are the possibilities for process mining in hospitals? In this book the authors provide an answer to this question by presenting a healthcare reference model that outlines all the different classes of data that are potentially available for process mining in healthcare and the relationships between them. Subsequently, based on this reference model, they explain the application opportunities for process mining in this domain and discuss the various kinds of analyses that can be performed. They focus on organizational healthcare processes rather than medical treatment processes. The combination of event data and process mining techniques allows them to analyze the operational processes within a hospital based on facts, thus providing a solid basis for managing and improving processes within hospitals. To this end, they also explicitly elaborate on data quality issues that are relevant for the data aspects of the healthcare reference model. This book mainly targets advanced professionals involved in areas related to business process management, business intelligence, data mining, and business process redesign for healthcare systems as well as graduate students specializing in healthcare information systems and process analysis.</p>
