The International Conference on Visual Communications and Image Processing (VCIP), sponsored by the IEEE Circuits and Systems Society and supported by the Institute of Image Processing, School of Electronic Engineering, University of Electronic Science and Technology of China, will be held in Chengdu during 27-30 Nov 2016. VCIP has served as a premier forum in SPIE and IEEE for the exchange of fundamental research results and technological advances in the field of visual communications and image processing since 1986. It provides a venue for leading engineers and scientists from around the world to advance the research frontiers in various areas of interest to VCIP.
