Nota di bibliografia	Includes bibliographical references (p. 165-172) and index.
Nota di contenuto	The emergence of drug testing -- The drug testing industry -- The detox industry -- Drug testing as social monitoring and control -- The politics of resistance.
Sommario/riassunto	Drug testing has become the norm in many workplaces. In order to get a job, potential employees are required to provide their urine for testing. Pissing on Demand examines this phenomenon along with the resulting rise of the anti-drug testing movement, or the ""detox industry,"" that works to beat these tests. Strategies include over-the-counter products like ""body flushers"" that sound innocent but are really designed to mask the presence of illegal drugs to kits advertised in pro-drug publications like High Times that make no bones about their real purpose. The first exposé of the detox industry.
