Conclusion and policy recommendations -- Chapter19. Summary of findings, conclusions and policy recommendations .</p>
Sommario/riassunto	<p>Written by 43 authors from Africa, Europe and Latin America, this book presents 19 topics addressing poverty in the context of Sustainable Development Goals (SDGs), leadership in implementing SDGs, and SDGs in service delivery and local government. As the world has gone past five years of implementing the 2030 Agenda for Sustainable Development and the intertwined 17 SDGs, new opportunities in research continue to open up. Hence, documenting some of the initiatives put in place around the world regarding the implementation of the SDGs is one of the aims of this publication. With 10 years remaining, the book further enhances the desire to scale up SDGs implementation. The selection of case studies from the selected regions also provides a balance in terms of how the SDGs are being</p>

rolled out for economic growth, environmental stewardship and social protection. The ambition remains even with the challenge brought by the COVID-19 pandemic that preoccupied the whole of 2020; spilling over to 2021. There is no doubt that resources have been diverted, but the world must stay on the course to 2030 and beyond. Therefore, the book is relevant for several stakeholders including the academics, development partners, government officials and other individuals that are involved in making sure no one is left behind in the lead to 2030.
