

1. Record Nr.	UNINA990008583580403321
Autore	Biancardi, Alberto
Titolo	Liberi di scegliere? : mercati e regole nei settori dell'energia / Alberto Biancardi, Fulvio Fontini
Pubbl/distr/stampa	Bologna : Il mulino, [2005]
ISBN	88-15-10527-1
Descrizione fisica	221 p. ; 21 cm
Altri autori (Persone)	Fontini, Fulvio
Disciplina	333.79
Locazione	DSS
Collocazione	L 673
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910337892103321
Titolo	The Spanish Coastal Systems : Dynamic Processes, Sediments and Management // edited by Juan A. Morales
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-319-93169-5
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (809 pages)
Disciplina	361.60946
Soggetti	Costes Sediments litorals Sedimentology Natural disasters Oceanography Coastal Sciences Natural Hazards Llibres electrònics Espanya
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Rocky Coasts and Cliffs -- Lineal Sandy Coasts and Beaches -- Fluvio Marine Systems -- Coastal Dunes -- Coast-Human Interaction Problems and Coastal Management.
Sommario/riassunto	This monograph presents the state of art of the geologic knowledge about the Spanish coast obtained through scientific research in the last 30 years. From a general point of view, coasts are the most quickly changing systems of the Earth. This is critical, since many human resources, such as the main part of economic and social activities, are located in the coastal areas. Especially in the case of Spain these coasts include cities, wide industrial areas (including harbor complexes), important ecologic systems, and our main economic resource: tourism. Understanding the dynamic functioning of each element of this coast is vital for correct future coastal management, so as to solve problems derived from bad plans developed in the last decades of the twentieth

century. This is a valuable text for advanced graduate students and coastal researchers, which connects the specific dynamic functioning of the main Spanish coastal environments and their relationships with human activities.
