Sommario/riassunto

There are many reasons why it is important to study local politics -- political culture, government, political process -- in Communist party states. As in all politics, local politics in Communist party states are the political articulation of the local community. This is the political arena where policies concerning local issues are formulated by the officials. This is where the officials are approached by citizens with their particular demands. This is where citizens articulate their preferences, aspirations, and values through political participation.

Sommario/riassunto	Cancer Nanotheranostics, Volume 2 continues the discussion of the important work being done in this field of cancer nanotechnology. The contents of these two volumes are explained in detail as follows. In the first volume of Cancer Nanotheranostics, we discussed the role of different nanomaterials for cancer therapy including lipid-based

nanomaterials, protein and peptide-based nanomaterials, polymer-based nanomaterials, metal-organic nanomaterials, porphyrin-based nanomaterials, metal-based nanomaterials, silica-based nanomaterials, exosome-based nanomaterials, and nano-antibodies. This important second volume discusses nano-based diagnosis of cancer, nano-oncology for clinical applications, nano-immunotherapy, nano-based photothermal cancer therapy, nanoerythrocytes for cancer drug delivery, regulatory perspectives of nanomaterials, limitations of cancer nanotheranostics, safety of nanobiomaterials for cancer nanotheranostics, multifunctional nanomaterials for targeting cancer nanotheranostics, and the role of artificial intelligence in cancer nanotheranostics. Volume 2 is a vital continuation of this two-volume set. Together, these two volumes create a comprehensive and unique examination of this important area of research.
