Nota di contenuto	Frontmatter -- Contents -- Introduction -- 1. The Bow of Promise -- 2. Emancipator versus Pettifogger -- 3. Sacred Effigies -- Notes -- Acknowledgments -- Index
Sommario/riassunto	Emancipating Lincoln seeks a new approach to the Emancipation Proclamation, a foundational text of American liberty that in recent years has been subject to woeful misinterpretation. These seventeen hundred words are Lincoln's most important piece of writing, responsible both for his being hailed as the Great Emancipator and for his being pilloried by those who consider his once-radical effort at emancipation insufficient and half-hearted. Harold Holzer, an award-winning Lincoln scholar, invites us to examine the impact of Lincoln's momentous announcement at the moment of its creation, and then as its meaning has changed over time. Using neglected original sources, Holzer uncovers Lincoln's very modern manipulation of the media—from his promulgation of disinformation to the ways he variously withheld, leaked, and promoted the Proclamation—in order to make his society-altering announcement palatable to America. Examining his agonizing revisions, we learn why a peerless prose writer executed what he regarded as his "greatest act" in leaden language. Turning from word to image, we see the complex responses in American sculpture, painting,

and illustration across the past century and a half, as artists sought to criticize, lionize, and profit from Lincoln's endeavor. Holzer shows the faults in applying our own standards to Lincoln's efforts, but also demonstrates how Lincoln's obfuscations made it nearly impossible to discern his true motives. As we approach the 150th anniversary of the Proclamation, this concise volume is a vivid depiction of the painfully slow march of all Americans—white and black, leaders and constituents—toward freedom.

Sommario/riassunto

This book is centred around various interwoven topics which are fundamental to policy analysis in agriculture. Key concepts and tools that are fundamental for the analysis of agricultural policies and programmes are presented. Key concepts introduced include, the role of the state in a market economy with examples from the Sri Lankan and other developing economies, the international trade environment, and conceptual frameworks for analysing important domestic and international trade policies. It also highlights interconnections among agriculture, development, policy and illustrates the extent to which the agricultural sector contributes in achieving economic growth objectives, equity and equality objectives and environmental objectives. The book takes the readers through the nature of agricultural markets in developing countries, with special emphasis on Sri Lanka, and illustrates how the degree of competitiveness is measured at various market levels using multiple indices and methods. Several tools, with accompanying case studies, for the analysis of policies and programmes are detailed. These tools include the GTAP model, gravity models, extended benefit cost analysis, and linear programming. Tools and models are applied to the analysis of trade policies and agreements, marketing policies, environmental services, extension programmes, land tenure reforms and climate change adaptations. Case studies in relation to the agri-food policy and strategy response to COVID-19 Pandemic are also covered. This book is of interest to public officials working in agricultural planning and agricultural policy, teachers, researchers, agro-economists, capacity builders and policymakers. Also the book serves as additional reading material for undergraduate and graduate students of agriculture, development studies, and environmental sciences. National and international agricultural scientists, policy makers will also find this to be a useful read.
